Databases:	MySql

PROJECTS / OPEN-SOURCE

Cleartrip Clone | Link   *JavaScript,React*
Tech Stack : React , Javascript , CSS , HTML.
Features : There is a login and register page and then there I am calling API which is bringing me the locations data and then I am fetching hotels according to that location .
In this project I made a cleartrip website in which when the user registers he can check for the hotels at the different parts of the country and the user can search for the hotels at that particular location

Calendar Website | Link   *JavaScript , React , Tailwind CSS*
Tech Stack: React, JavaScript,Tailwind css
Features: It can add a new event with specific titles and dates and it can also modify the existing events and here Day.js is being used to get accurate date handling
Project Description: A fully responsive Calendar website built with React, Tailwind CSS, and Day.js.
The app supports event creation, editing, deletion, and dynamic calendar views.
